Brief Summary:

In 2021, the Village began a program to improve our pond maintenance and aesthetics. A newer, environmentally friendly chemical is being used and fountains were being added. This FY, we are adding another pond to the project. Initial pumps were selected based on the size of the ponds. However, we realize now that larger pumps would have improved the circulation needed. It is our plan to order 2 new, larger, fountain systems for the existing Pheasant Run Pond and the Cardinal Dr Pond. And then locate the 2 smaller pumps in the Eastern pond located in Hunters Run (north end/south end). Electricity already exists at new pond and installation will be completed by in-house labor.
